## Press-fit Chain Link Tools

Since about 1990, most new chains use press-fit type side plates on the connecting links. On this type of link, the side plate can not be installed properly without the aid of a special tool. The chain manufactures have decided the press fit adds strength to the connecting link and should always be used. The Motion Pro chain press tools below are designed to install the press-fit connecting links on 520-530 standard and O-Ring chains.

### Chain Breaker & Riveting Tool 121-08058

- Versatile enough to be used on cam chains or drive chains
- Can be used as a chain breaker by pushing pin out
- Each kit includes 3 pin sizes to fit a variety of chains
- Now the kit includes press plates (121-08067)

**121-080059 2mm Replacement Pin**

**121-080060 3mm Replacement Pin**

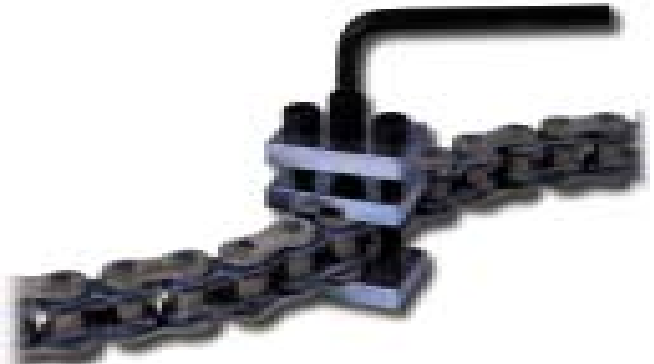

**121-080061 4mm Replacement Pin**

**121-080062 Replacement Rivet Tip**

### Mini Chain Press Tool 121-08070

- Fits most 520-530 standard and O-ring chains
- Tool box or fanny pack size
- Hex key wrench is included with tool
- Made in the U.S.A.

### Press Fit Chain Link Tool Kit

- Fits 520-530 standard and O-ring chains.

**121-08066 Chain Press Tool Kit**

**121-08067 Press Plate Only**

### Chain Alignment Tool 121-08048

- Quick and accurate alignment.
- Tool body clamps to rear sprocket while alignment rod points toward front sprocket.
- Made in the U.S.A.
